0.5 mL of TEH SURR was added to all samples

0.5 mL of TEH SP was added to all spikes

pH of all samples adjusted to pH ≤ 2 with H₂SO₄

☒ Samples were continually extracted about 450 mL of CH₂Cl₂
 & HPLC H₂O

Extraction Start Time:

Extraction End Time:

☐ Samples were extracted 3 times with 60 mL of CH₂Cl₂

Extracts filtered through baked, CH₂Cl₂-rinsed granular Na₂SO₄

Concentrated to volumes as noted above

Calibration Table

NEW ICAL *gm* 23 OCT 2006
HPLC05 METHOD 8310

Calib. Data Modified : 10/23/2006 5:18:58 PM

Calculate : External Standard
Based on : Peak Area

Rel. Reference Window : 1.000 %
Abs. Reference Window : 0.150 min
Rel. Non-ref. Window : 1.000 %
Abs. Non-ref. Window : 0.150 min

Do not use Multiplier & Dilution Factor with ISTDs

Uncalibrated Peaks : not reported
Partial Calibration : Yes, identified peaks are recalibrated
Correct All Ret. Times: No, only for identified peaks

Curve Type : Linear
Origin : Ignored
Weight : Equal

Recalibration Settings:
Average Response : Average all calibrations
Average Retention Time: Floating Average New 75%

10/30/06

Calibration Report Options :
Printout of recalibrations within a sequence:
 Calibration Table after Recalibration
 Normal Report after Recalibration
If the sequence is done with bracketing:
 Results of first cycle (ending previous bracket)

0.1 mL of surrogate solution was added to all samples

1.0 mL of matrix spiking solution was added to all spikes

☒ Samples continuously extracted with about 450 mL of CH_2Cl_2

Extraction Start Time:

Extraction End Time:

☐ Samples were extracted 3 times with 60 mL of CH_2Cl_2

Extracts filtered through baked, CH_2Cl_2 -rinsed powdered Na_2SO_4

Exchanged 2x with Acetonitrile

Concentrated: ☒ to volumes as noted above ☐ to clean-up volume

Clean-up (if necessary): ☐ GPC (see GPC run log) ☐ Silica Gel

Extracts filtered with 0.45 um PTFE syringe filter

Tuning Parameters

===Plasma Condition===

RF Power: 1270 W
RF Matching: 1.78 V
Smpl Depth: 7.1 mm
Torch-H: -1.3 mm
Torch-V: 0.5 mm
Carrier Gas: 1.09 L/min
Makeup Gas: 0 L/min
Optional Gas: --- %
PeriPump1: 0.1 rps
PeriPump2: --- rps
S/C Temp: 2 degC

===Ion Lenses===

Extract 1: -180 V
Extract 2: -40 V
Einzel 1,3: -100 V
Einzel 2: -7 V
Omega Bias: -45 V
Omega (+): 4 V
Omega (-): -4 V
QP Focus: 9 V
Plate Bias: 0 V

===Q-Pole Parameters===

AMU Gain: 130
AMU Offset: 125
Axis Gain: 0.9989
Axis Offset: -0.01
QP Bias: 1.6 V

===Detector Parameters===

Discriminator: 9.3 mV
Analog HV: 1810 V
Pulse HV: 1160 V

CASE NARRATIVE

Laboratory number: 191314
Client: Treadwell & Rollo
Project: 2893.04.51
Location: Presidio
Request Date: 12/07/06
Samples Received: 12/07/06

This hardcopy data package contains sample and QC results for nineteen water samples, requested for the above referenced project on 12/07/06. The samples were received cold and intact.

TPH-Purgeables and/or BTXE by GC (EPA 8015B and EPA 8021B):

No analytical problems were encountered.

TPH-Extractables by GC (EPA 8015B):

Matrix spikes were not performed for sample 1065PZ2A (191314-011) due to insufficient sample volume. Low recoveries were observed for diesel C12-C24 in the MS/MSD of LF10SP01 (lab # 191314-003); the LCS was within limits, and the associated RPD was within limits. 1065PZ2A (lab # 191314-011) and 1065PZ4A (lab # 191314-012) have higher reporting limits as a result of different volumes extracted. No other analytical problems were encountered.

Volatile Organics by GC/MS (EPA 8260B):

No analytical problems were encountered.

Polynuclear Aromatics by HPLC (EPA 8310):

Low recoveries were observed for benzo(a)pyrene in the MS/MSD of 514AGW101 (lab # 191314-019); the LCS was within limits, and the associated RPD was within limits. No other analytical problems were encountered.

Metals (EPA 6020 and EPA 7470A) Water:

High response was observed for aluminum in the CCV analyzed 12/13/06 22:04; this analyte was not detected at or above the RL in the associated sample. Low recoveries were observed for calcium and manganese in the MS of LF10SP01 (lab # 191314-003); the BS/BSD were within limits, and the associated RPDs were within limits. Responses exceeding the instrument's linear range were observed for sodium in the MS/MSD of LF10SP01 (lab # 191314-003). High % difference was observed for sodium in the serial dilution of LF10SP01 (lab # 191314-003). No other analytical problems were encountered.

Metals (EPA 6020 and EPA 7470A) Filtrate:

Responses exceeding the instrument's linear range were observed for magnesium, manganese, and sodium in the MS/MSD of LF10SP01 (lab # 191314-003) and the MS/MSD of 1065PZ2A (lab # 191314-011). High % differences were observed for calcium and sodium in the serial dilution of LF10SP01 (lab # 191314-003). No other analytical problems were encountered.

CASE NARRATIVE

Laboratory number: 191314
Client: Treadwell & Rollo
Project: 2893.04.51
Location: Presidio
Request Date: 12/07/06
Samples Received: 12/07/06

Ion Chromatography (EPA 300.0):

No analytical problems were encountered.

Alkalinity (EPA 310.1):

No analytical problems were encountered.

Sulfide (EPA 376.2):

Low recoveries were observed for sulfide in the MS/MSD of 1065PZ2A (lab # 191314-011); the LCS was within limits, and the associated RPD was within limits. No other analytical problems were encountered.

Total Dissolved Solids (TDS) (EPA 160.1):

No analytical problems were encountered.

Subject: RE: 2893.04.51 - C&T Login Summary (191314)

Hi Steve,

In reviewing the logins I found an error on this chain. Hopefully it's not too late to change this.

Sample 1065PZ2A should be analyzed for BTEX/MTBE not PAH. The wrong box was checked off on the chain.

Same thing for 1065 PZ4A:

Sample 1065PZ4A should be analyzed for BTEX/MTBE not PAH. The wrong box was checked off on the chain.

Thanks,

-Gil

Hi Steve,

Please cancel this correction. Not all the wells at this site start with BHW.
The original chain was in fact correct. My mistake.

However the other correction, changing the PAH analysis to BTEX/MTBE for 1065PZ2A and 1065PZ4A is right.
Please go ahead with that one if you haven't already.

Thanks,

-Gil

Hi Steve,

A couple of the samples were mislabeled on the chain, could you please fix them.

HWGW100 should read BHWGW100

And

HWGW101 should read BHWGW101

Thanks,

Gil

Steve,

Please attempt with the VOA vials, if you can get enough material.

COOLER RECEIPT CHECKLIST

Login#: 191314 Date Received: 12/7/06 Number of Coolers: 4
Client: Treadwell+Keller Project: Presidio

A. Preliminary Examination Phase

Date Opened: 12/7/06 By (print): Peter P. (sign) Peter P.

1. Did cooler come with a shipping slip (airbill, etc.)?..... YES ☒ NO

If YES, enter carrier name and airbill number: _____

2. Were custody seals on outside of cooler?..... YES ☒ NO

How many and where? 1 on lid Seal date: 12/7/06 Seal name: PK

3. Were custody seals unbroken and intact at the date and time of arrival?..... YES ☒ NO

4. Were custody papers dry and intact when received?..... YES ☒ NO

5. Were custody papers filled out properly (ink, signed, etc.)?..... YES ☒ NO

6. Did you sign the custody papers in the appropriate place?..... YES ☒ NO

7. Was project identifiable from custody papers?..... YES ☒ NO

If YES, enter project name at the top of this form.

8. If required, was sufficient ice used? Samples should be 2-6 degrees C. YES ☒ NO

Type of ice: WET Temperature: 1.9°, 1.7°, 2.3°, 3.8°

B. Login Phase

Date Logged In: 12/7/06 By (print): Peter P. (sign) Peter P.

1. Describe type of packing in cooler: Zip loc bags

2. Did all bottles arrive unbroken?..... YES ☒ NO

3. Were labels in good condition and complete (ID, date, time, signature, etc.)?..... YES ☒ NO

4. Did bottle labels agree with custody papers?..... YES ☒ NO

5. Were appropriate containers used for the tests indicated?..... YES ☒ NO

6. Were correct preservatives added to samples?..... YES ☒ NO

7. Was sufficient amount of sample sent for tests indicated?..... YES ☒ NO

8. Were bubbles absent in VOA samples? If NO, list sample IDs below..... YES ☒ NO

9. Was the client contacted concerning this sample delivery?..... YES ☒ NO

If YES, give details below.

Who was called? _____ By whom? _____ Date: _____

Additional Comments:

Sample 005 preserved in lab w/ HNO₃.

TPH-Purgeables and BTXE

0.5 mL of TEH_SURR was added to all samples
 * 0.1 / 0.5 mL of TEH_SP was added to all spikes
 pH of all samples adjusted to pH ≤ 2 with H₂SO₄

☒ Samples were continually extracted about 450 mL of CH₂Cl₂

Extraction Start Time: 1010 / * 1640
 Extraction End Time: 0720 / * 1045

☐ Samples were extracted 3 times with 60 mL of CH₂Cl₂

Extracts filtered through baked, CH₂Cl₂-rinsed granular Na₂SO₄
 Concentrated to volumes as noted above

Instrument amount = a0 + response * a1 + response^2 * a2; LINR-Linear regression

Calibration Table

NEW ICAL *Jim* 23 OCT 2006
HPLC05 METHOD 8310

Calib. Data Modified : 10/23/2006 5:18:58 PM

Calculate : External Standard
Based on : Peak Area

Rel. Reference Window : 1.000 %
Abs. Reference Window : 0.150 min
Rel. Non-ref. Window : 1.000 %
Abs. Non-ref. Window : 0.150 min
Do not use Multiplier & Dilution Factor with ISTDs
Uncalibrated Peaks : not reported
Partial Calibration : Yes, identified peaks are recalibrated
Correct All Ret. Times: No, only for identified peaks

Curve Type : Linear
Origin : Ignored
Weight : Equal

Recalibration Settings:
Average Response : Average all calibrations
Average Retention Time: Floating Average New 75%

10/30/06

Calibration Report Options :
Printout of recalibrations within a sequence:
Calibration Table after Recalibration
Normal Report after Recalibration
If the sequence is done with bracketing:
Results of first cycle (ending previous bracket)

0.1 mL of surrogate solution was added to all samples
1.0 mL of matrix spiking solution was added to all spikes
☒ Samples continuously extracted with about 450 mL of CH₂Cl₂

Extraction Start Time:

Extraction End Time:

☐ Samples were extracted 3 times with 60 mL of CH₂Cl₂Extracts filtered through baked, CH₂Cl₂-rinsed powdered Na₂SO₄

Exchanged 2x with Acetonitrile

Concentrated: ☒ to volumes as noted above ☐ to clean-up volumeClean-up (if necessary): ☐ GPC (see GPC run log) ☐ Silica Gel

Extracts filtered with 0.45 um PTFE syringe filter

Tuning Parameters

===Plasma Condition===

RF Power: 1270 W
RF Matching: 1.78 V
Smpl Depth: 7.1 mm
Torch-H: -1.3 mm
Torch-V: 0.5 mm
Carrier Gas: 1.09 L/min
Makeup Gas: 0 L/min
Optional Gas: --- %
PeriPump1: 0.1 rps
PeriPump2: --- rps
S/C Temp: 2 degC

===Ion Lenses===

Extract 1: -180 V
Extract 2: -40 V
Einzel 1,3: -100 V
Einzel 2: -7 V
Omega Bias: -45 V
Omega (+): 4 V
Omega (-): -4 V
QP Focus: 9 V
Plate Bias: 0 V

===Q-Pole Parameters===

AMU Gain: 130
AMU Offset: 125
Axis Gain: 0.9989
Axis Offset: -0.01
QP Bias: 1.6 V

===Detector Parameters===

Discriminator: 9.3 mV
Analog HV: 1810 V
Pulse HV: 1160 V

Curtis & Tompkins Laboratories
MDL Summary for EPA 6020 Water 200.8
As of 01/05/07

Analyte	Units	MET06 A	MET06 E	MET06 H	MET05
Aluminum	ug/L	0.40			9.6
Antimony	ug/L	0.0093			0.062
Arsenic	ug/L		0.034		0.34
Barium	ug/L	0.023			0.13
Beryllium	ug/L	0.017			0.12
Cadmium	ug/L	0.0058			0.17
Calcium	ug/L	5.6			15
Chromium	ug/L		0.038		0.18
Cobalt	ug/L		0.0072		0.069
Copper	ug/L		0.028		0.24
Iron	ug/L			1.9	16
Lead	ug/L	0.013			0.088
Magnesium	ug/L	0.73			11
Manganese	ug/L		0.011		0.050
Molybdenum	ug/L	0.0063			0.24
Nickel	ug/L		0.029		0.21
Potassium	ug/L	5.3			8.7
Selenium	ug/L			0.027	0.35
Silver	ug/L	0.0079			0.068
Sodium	ug/L		2.7		14
Thallium	ug/L	0.030			0.030
Vanadium	ug/L		0.026		0.24
Zinc	ug/L		0.062		0.23

CASE NARRATIVE

Laboratory number: 191358
Client: Treadwell & Rollo
Project: 2893.04.51
Location: Presidio
Request Date: 12/08/06
Samples Received: 12/08/06

This hardcopy data package contains sample and QC results for fourteen water samples, requested for the above referenced project on 12/08/06. The samples were received cold and intact.

TPH-Purgeables and/or BTXE by GC (EPA 8015B and EPA 8021B):

High responses were observed for benzene and ethylbenzene in the ICV analyzed 11/16/06 00:02; these analytes were not detected at or above the RL in the associated samples. No other analytical problems were encountered.

TPH-Extractables by GC (EPA 8015B):

No analytical problems were encountered.

Volatile Organics by GC/MS (EPA 8260B):

High surrogate recoveries were observed for 1,2-dichloroethane-d4 in 1047MW101 (lab # 191358-008) and 1047MW101RB1065MW9B (lab # 191358-010); no target analytes were detected in these samples. Methylene chloride was detected above the RL in TB1207061A (lab # 191358-012); this analyte is a common laboratory contaminant. No other analytical problems were encountered.

Metals (EPA 6020 and EPA 7470A) Water:

Low recoveries were observed for calcium and manganese in the MS of LF10SP01 (lab # 191314-003); the BS/BSD were within limits, and the associated RPDs were within limits. Responses exceeding the instrument's linear range were observed for sodium in the MS/MSD of LF10SP01 (lab # 191314-003). High % difference was observed for sodium in the serial dilution of LF10SP01 (lab # 191314-003). No other analytical problems were encountered.

Metals (EPA 6020) Filtrate:

High responses were observed for aluminum and magnesium in the CCV analyzed 12/13/06 22:04 and the CCV analyzed 12/13/06 23:39; these analytes were not detected at or above the RL in the associated samples. Low recoveries were observed for calcium and manganese in the MS of LF10SP01 (lab # 191314-003); the BS/BSD were within limits, and the associated RPDs were within limits. Responses exceeding the instrument's linear range were observed for sodium in the MS/MSD of LF10SP01 (lab # 191314-003). High % difference was observed for sodium in the serial dilution of LF10SP01 (lab # 191314-003). No other analytical problems were encountered.

Ion Chromatography (EPA 300.0):

No analytical problems were encountered.

CASE NARRATIVE

Laboratory number: 191358
Client: Treadwell & Rollo
Project: 2893.04.51
Location: Presidio
Request Date: 12/08/06
Samples Received: 12/08/06

Total Cyanide (EPA 335.2):

No analytical problems were encountered.

Total Oil & Grease (HEM) (EPA 1664A):

Matrix spikes were not performed for this analysis due to insufficient sample volume. No analytical problems were encountered.

Phenolic Compounds (EPA 420.1):

No analytical problems were encountered.

Alkalinity (EPA 310.1):

No analytical problems were encountered.

Sulfide (EPA 376.2):

Low recoveries were observed for sulfide in the MS/MSD of 1065PZ2A (lab # 191314-011); the LCS was within limits, and the associated RPD was within limits. No other analytical problems were encountered.

Dissolved Sulfide (EPA 376.2):

No analytical problems were encountered.

Total Dissolved Solids (TDS) (EPA 160.1):

No analytical problems were encountered.

pH (EPA 9040B):

WT120706 (lab # 191358-013) was analyzed the day after sampling, but four hours outside the 24 hour window. No analytical problems were encountered.

COMMENTS / NOTES

Notes: 1 - Use EPA 3630A Silica Gel Cleanup Step. 2 - General Chemistry (Total Alkalinity, Bicarbonate, Chloride, Fluoride, Nitrate, Nitrite, and Sulfate)

3 - Indicate in the metals column (by number) which metals list is requested. Metals Lists (23 - Al, Sb, As, Ba, Be, Cr, Cd, Ca, Co, Cu, Fe, Pb, Mg, Mn, Ni, K, Ag, Na, Se, Ti, V, and Zn)

Metals List Cont. (22 - Al, Sb, As, Ba, Be, Cr, Cd, Ca, Co, Cu, Fe, Pb, Mg, Mn, Ni, K, Ag, Na, Se, Ti, V, and Zn) (13 - As, Cr, Cd, Cu, Fe, K, Mg, Mn, Ni, Pb, and Zn)

Metals List Cont. (7 - As, Cr, Cd, Cu, Pb, Ni and Zn) (3 - Al, Fe, and Cr) (Other -)

(9 - As, Cr, Cd, Cu, Fe, Mn, Pb, Ni and Zn) (8 - As, Cr, Cd, Cu, Fe, Pb, Ni and Zn)

Effective Date: 10-May-99
Revision: 1 Number 1 of 3
Filename: F:\QC\Forms\QC\Cooler.wpd

COOLER RECEIPT CHECKLIST

Login#: 191358 Date Received: 12-08-06 Number of Coolers: 4
Client: TREADWELL Project: Presidio

A. Preliminary Examination Phase

Date Opened: 12-08-06 By (print): Charles (sign) Charles
1. Did cooler come with a shipping slip (airbill, etc.)? YES ☒ NO ☒
If YES, enter carrier name and airbill number: _____

2. Were custody seals on outside of cooler? YES ☒ NO ☒
How many and where? one over top of cooler Seal date: 12/7/06 Seal name: K

3. Were custody seals unbroken and intact at the date and time of arrival? YES ☒ NO ☒

4. Were custody papers dry and intact when received? YES ☒ NO ☒

5. Were custody papers filled out properly (ink, signed, etc.)? YES ☒ NO ☒

6. Did you sign the custody papers in the appropriate place? YES ☒ NO ☒

7. Was project identifiable from custody papers? YES ☒ NO ☒

If YES, enter project name at the top of this form.

8. If required, was sufficient ice used? Samples should be 2-6 degrees C. YES ☒ NO ☒
Type of ice: wet Temperature: 2.7° 3.1° 1.1°

No Temp Blank in one

B. Login Phase

Date Logged In: 12-08-06 By (print): Charles (sign) Charles

1. Describe type of packing in cooler: Ziploc Bags

2. Did all bottles arrive unbroken? YES ☒ NO ☒

3. Were labels in good condition and complete (ID, date, time, signature, etc.)? YES ☒ NO ☒

4. Did bottle labels agree with custody papers? YES ☒ NO ☒

5. Were appropriate containers used for the tests indicated? YES ☒ NO ☒

6. Were correct preservatives added to samples? YES ☒ NO ☒

7. Was sufficient amount of sample sent for tests indicated? YES ☒ NO ☒

8. Were bubbles absent in VOA samples? If NO, list sample IDs below. YES ☒ NO ☒

9. Was the client contacted concerning this sample delivery? YES ☒ NO ☒

If YES, give details below.

Who was called? _____ By whom? _____ Date: _____

Additional Comments:

4) sample -15 and -16 not on COC: logged in on HOLD

12/17/06
 0.5 mL of TEH_SURR was added to all samples
 0.5 mL of TEH_SP was added to all spikes
 pH of all samples adjusted to pH ≤ 2 with H₂SO₄
☒ Samples were continually extracted about 450 mL of CH₂Cl₂
 Extraction Start Time: _____
 Extraction End Time: _____
☐ Samples were extracted 3 times with 60 mL of CH₂Cl₂
 Extracts filtered through baked, CH₂Cl₂-rinsed granular Na₂SO₄
 Concentrated to volumes as noted above

RECEIVED**OCT 17 2006****TREADWELL & ROLLO****RE: Presidio**

Dear Josh:

Enclosed are the results of the sample(s) submitted to our laboratory on August 17, 2006. For your reference, these analyses have been assigned our service request number D0601136.

All analyses were performed according to our laboratory's quality assurance program. The test results meet requirements of the NELAP standards except as noted in the case narrative report. All results are intended to be considered in their entirety, and Columbia Analytical Services, Inc. (CAS) is not responsible for use of less than the complete report. Results apply only to the items submitted to the laboratory for analysis and individual items (samples) analyzed, as listed in the report.

Please call if you have any questions. My extension is 104. You may also contact me via email at KSellers@redding.caslab.com.

Respectfully submitted,

Columbia Analytical Services, Inc.

Karen Sellers
Project Chemist

CC: Donna Breaux

Current CAS Redding Accreditation Programs

Federal and National Programs

- U.S Air Force, Air Force Center for Environmental Excellence (AFCEE)
Approved laboratory for Wastewater and Hazardous Waste
- U.S. Army Corps of Engineers – MRD, HTRW Mandatory Center of Expertise
Validated for Wastewater and Hazardous Waste
- Department of the Navy, Naval Facilities Engineering Service Center (NFESC)
Approved laboratory for Wastewater and Hazardous Waste

State and Local Programs

- State of Alaska, Department of Environmental Conservation
Approved Laboratory for Contaminated Sites
Lab ID UST-001
- State of Arizona, Department of Health Services, Office of Laboratory Licensure
Approved Laboratory for Drinking Water, Wastewater, and Hazardous Waste
Lab ID AZ0604
- State of California, Department of Health Services, National Environmental Laboratory Accreditation Program (NELAP)
Approved Laboratory for Drinking Water, Wastewater and Hazardous Waste
Lab ID 01105CA
 - Los Angeles County Sanitation District
Approved Laboratory for Wastewater
Lab ID 10243
- State of California, Department of Health Services, Environmental Laboratory Accreditation Program (ELAP)
Approved Laboratory for Microbiology of Drinking Water and Wastewater
Lab ID 2635
- State of Florida, Department of Health, Bureau of Laboratories (NELAP)
Approved Environmental Testing Laboratory for Wastewater and Hazardous Waste
Lab ID E87203
- State of Kansas, Department of Health and Environment (NELAP)
Approved Laboratory for Hazardous Waste
Lab ID E-10323
- State of Massachusetts, Department of Environmental Protection
Approved laboratory for Drinking Water and Wastewater
Lab ID M-CA025
- State of Oklahoma, Department of Environmental Quality
Approved Laboratory for General Water Quality/Sludge Testing
Lab ID 9952
- State of Oregon, Environmental Laboratory Accreditation Program (ORELAP)
Approved Laboratory for Drinking Water, Wastewater, and Hazardous Waste
Lab ID CA200004
- State of Utah, Department of Health, Bureau of Laboratory Improvement (NELAP)
Approved Laboratory for Wastewater and Hazardous Waste
Lab ID QUAL1
- State of Washington, Department of Ecology
Approved Laboratory for Wastewater and Hazardous Waste
Lab ID C1234
- State of Wisconsin, Department of Natural Resources
Approved Laboratory for Wastewater and Hazardous Waste
Lab ID 999767340

Data Qualifiers for Organic Analyses

- A -- This qualifier indicates that a Tentatively Identified Compound (TIC) is a suspected aldol-condensation product.
- B -- This qualifier is used when the analyte is found in the associated blank as well as the sample, indicating possible blank contamination. The data user should carefully evaluate the qualified analyte and the reported concentrations.
- C -- This qualifier indicates the presence of this compound has been confirmed by the GC/MS analysis.
- D -- This qualifier is used for all the analytes identified in an analysis at a secondary dilution factor. "D" qualifiers are used only for the samples reported at more than one dilution factor.
- E -- This qualifier indicates that the value reported exceeds the linear calibration range for that analyte. Therefore, the sample should be reanalyzed at the appropriate dilution. The "E" qualified amount is an estimated concentration, and the results of the dilution will be reported on a separate Form I.
- J -- Indicates an estimated value. This qualifier is used when the data indicates the presence of a target analyte below the reporting limit or the presence of a Tentatively Identified Compound (TIC).
- N -- This qualifier indicates presumptive evidence of an analyte. This flag is only used for Tentatively Identified Compounds (TIC) where the identification is based on a mass spectral library research. It is applied to all TIC results. For generic characterization of a TIC, such as a chlorinated hydrocarbon, the "N" qualifier is not used.
- P -- This qualifier is used for target analytes when there is a greater than 40% difference for detected concentrations between the two columns or detectors. The concentration value is reported on Form I and flagged with a "P".
- U -- Indicates the compound was analyzed for but not detected. The number adjacent to the "U" qualifier indicates the reporting limit for that compound. The reporting limit can vary from sample to sample depending on dilution factors or percent moisture adjustments when indicated.
- DL -- Diluted reanalysis. "DL" indicates that the results were determined in an analysis of a secondary dilution of a sample or extract. A digit to indicate multiple dilutions of the sample or extract may follow the "DL" suffix. The results of more than one diluted reanalysis may be reported.
- MS -- Matrix spike (may be followed by a digit to indicate multiple matrix spikes within a sample set).
- MSD -- Matrix spike duplicate (may be followed by a digit to indicate multiple matrix spikes within a sample set).
- R -- Reanalysis. The extract was reanalyzed without re-extraction. The "R" is not used if the sample was also re-extracted. It may be followed by a digit to indicate multiple reanalysis of the sample at the same dilution.
- RE -- Re-extraction and reanalysis. The sample was re-extracted and reanalyzed. It may be followed by a digit to indicate multiple re-extracted analysis of the same sample at the same dilution.

Data Qualifiers for Metals and Wet Chemistry Analyses

- B or J**-- The reported value obtained was less than the MRL/CRDL, but greater than or equal to the MDL/IDL.
- U** -- The value was less than the MDL/IDL or was not detected.
- E** -- The reported value is estimate because of interference.
- N** -- Spiked sample recovery not within control limits.
- ND** -- Not detected at or above the MRL/CRDL.
- *** -- Duplicate analysis not within control limits.

COLUMBIA ANALYTICAL SERVICES, INC.

Client: Treadwell and Rollo, Inc.
Project: Presidio
Sample Matrix: Aqueous

Service Request No.: D0601136
Date Received: 08/17/06

CASE NARRATIVE

All analyses were performed consistent with the quality assurance program of Columbia Analytical Services, Inc. (CAS). This report contains analytical results for samples designated for Tier III data deliverables.

Sample Receipt

Five aqueous samples were received for analysis at Columbia Analytical Services on 08/17/06.

No discrepancies were noted upon initial sample inspection. The samples were received in good condition and consistent with the accompanying chain of custody form. The samples were stored in a refrigerator at 4°C upon receipt at the laboratory.

General Chemistry Parameters (160.1, 300.0, 310.1)

Holding Time Exceptions:

The holding times on samples LF6GW103CL, 1065MW9BCL and for Nitrate by method E300.0 were exceeded. The IC autosampler was unable to load and inject sample into instrument ICS2000 due to high system backpressure resulting from a clog in the injection valve. Instrument was down from 08/16/06 to 08/18/06. Efforts were made to analyze the samples as soon as possible after the analytical system was back on line. However, the analysis of the samples was performed from 3.0 hours to 4.0 hours past the recommended holding time.

Elevated Method Reporting Limits:

The following samples required analysis on dilution due to the presence of elevated target analyte or matrix interferences:

- Samples LF6GW103CL and 1065MW9BCL for Chloride and Fluoride due to matrix interferences.
- Sample LF6GW103CL for Sulfate due to elevated levels of target analyte.
- Sample 1065MW9BCL for Total Dissolved Solids due to elevated levels of target analyte.
- Sample 1213GW101CL for Chloride, Fluoride and Sulfate due to elevated levels of target analyte.
- Sample 1213GW101CL for Nitrate due to matrix interferences.
- Sample 1213GW101CL for Chloride, Fluoride and Sulfate due to elevated levels of target analyte.

Dissolved Metals (6010B/6020/7470)

No anomalies associated with the analysis of these samples by the above-mentioned method were observed.

Diesel Range Organics by EPA Method 8015B

Surrogate Exceptions:

The upper control criterion was exceeded for the following surrogates in samples DWB10821, DWB10821LCSD, LF6GW103CL and Continuing Calibration Verification F0907019: Triacotane and Octacosane. No target analytes were detected in the sample. The error associated with an elevated recovery equates to a high bias. The quality of the sample data is not significantly affected. No further corrective action was appropriate.

Approved by: _____

Date: _____

10-13-06

COLUMBIA ANALYTICAL SERVICES, INC.

Matrix Spike Recovery Exceptions:

Insufficient sample volume was received to perform a Matrix Spike/Matrix Spike Duplicate (MS/MSD). A Laboratory Control Sample/Duplicate Laboratory Control Sample (LCS/DLCS) was analyzed in order to report precision data.

Lab Control Sample Exceptions:

The upper control criterion was exceeded for the following analyte in Laboratory Control Samples DWB10821LCS and DWB10821LCSD: TPH-Diesel. The analyte in question was not detected in the associated field samples. The error associated with elevated recovery equates to a high bias. The sample data is not significantly affected. No further corrective action was appropriate.

Sample Notes and Discussion

Silica gel clean up was performed prior to instrumental analysis.

Gasoline Range Organics by EPA Method 8015B and Purgeable Aromatics Method 8021A

The primary evaluation criterion was exceeded for the following analytes in Continuing Calibration Verification (CCVs) NP083001 and NP083006: Benzene and tert-Butyl Methyl Ether. In accordance with CAS standard operating procedures, the alternative evaluation specified in the EPA method was performed using the average percent recovery of all analytes in the verification standard. The standard meets the alternative evaluation criteria

Organochlorine Pesticides by EPA Method 8081A

The primary evaluation criterion was exceeded for the following analytes in Continuing Calibration Verification (CCV) D0830019: Endosulfan sulfate. In accordance with CAS standard operating procedures, the alternative evaluation specified in the EPA method was performed using the average percent recovery of all analytes in the verification standard. The standard meets the alternative evaluation criteria.

Decachlorobiphenyl surrogate recoveries were below the project specific requirement in all samples but within the statistical control criteria. However, Tetrachloro-m-xylene as additional surrogate for this analysis, were within the acceptance limit. Since the spike recoveries in Sample PWB10821LCS were within control criteria; the quality of the sample data is not affected.

PCB Aroclors by EPA Method 8082

The upper control criterion was exceeded for the following surrogate in Continuing Calibration Verification (CCV) C0824020: Tetrachloro-m-xylene. Since the apparent problem equates to a potential high bias, the data quality is not affected. No further corrective action was required.

Decachlorobiphenyl surrogate recoveries were below the project specific requirement in all samples but within the statistical control criteria. However, Tetrachloro-m-xylene as additional surrogate for this analysis, were within the acceptance limit; with the exception in sample PWB10821LCSD. It appeared that low recoveries for surrogate and target analytes were caused by an error during the sample preparation step. Since the spike recoveries in Sample PWB10821LCS were within control criteria; the quality of the sample data is not affected.

The control criteria were exceeded for Decachlorobiphenyl surrogates in sample LF6GW103CL. All samples were reanalyzed for confirmation. A reextraction of sample LF6GW103CL was not performed because insufficient sample was available. No further corrective action was possible.

Approved by: _____

Date: 10-13-06

COLUMBIA ANALYTICAL SERVICES, INC.

Volatile Organic Compounds by EPA Method 8260B

No anomalies associated with the analysis of these samples by the above-mentioned method were observed.

Polynuclear Aromatic Hydrocarbons by EPA Method 8310

Surrogate Exceptions:

The lower control criterion was exceeded for the following surrogate in sample LF6GW103CL: Terphenyl-d14. No target analytes were detected in the sample. Although the surrogate recovery was below the project specific control limit of 65–135%, the surrogate recovery was within the laboratory's control limit of 44–116%. A similar situation (low surrogate recovery) was noticed in the previous service request on this project (D0600543). The data has been qualified on the report.

APPENDIX

September 6, 2006

Service Request No: D0601136

Karen Sellers
Columbia Analytical Services
5090 Caterpillar Rd.
Redding, CA 96003

RE: Presidio

Dear Karen:

Enclosed are the results of the sample(s) submitted to our laboratory on August 17, 2006. For your reference, these analyses have been assigned our service request number D0601136.

All analyses were performed according to our laboratory's quality assurance program. The test results meet requirements of the NELAC standards. Exceptions are noted in the case narrative report where applicable. All results are intended to be considered in their entirety, and Columbia Analytical Services, Inc. (CAS) is not responsible for use of less than the complete report. Results apply only to the items submitted to the laboratory for analysis and individual items (samples) analyzed, as listed in the report.

Please call if you have any questions. My extension is 3376. You may also contact me via Email at GSalata@kelso.caslab.com.

Respectfully submitted,

Columbia Analytical Services, Inc.

Gregory Salata, Ph.D.
Project Chemist

GS/jm

DOE	Department of Ecology
DOH	Department of Health
EPA	U. S. Environmental Protection Agency
ELAP	Environmental Laboratory Accreditation Program
GC	Gas Chromatography
GC/MS	Gas Chromatography/Mass Spectrometry
LUFT	Leaking Underground Fuel Tank
M	Modified
MCL	Maximum Contaminant Level is the highest permissible concentration of a substance allowed in drinking water as established by the USEPA.
MDL	Method Detection Limit
MPN	Most Probable Number
MRL	Method Reporting Limit
NA	Not Applicable
NC	Not Calculated
NCASI	National Council of the Paper Industry for Air and Stream Improvement
ND	Not Detected
NIOSH	National Institute for Occupational Safety and Health
PQL	Practical Quantitation Limit
RCRA	Resource Conservation and Recovery Act
SIM	Selected Ion Monitoring
TPH	Total Petroleum Hydrocarbons
tr	Trace level is the concentration of an analyte that is less than the PQL but greater than or equal to the MDL.

Inorganic Data Qualifiers

- * The result is an outlier. See case narrative.
- # The control limit criteria is not applicable. See case narrative.
- B The analyte was found in the associated method blank at a level that is significant relative to the sample result.
- E The result is an estimate amount because the value exceeded the instrument calibration range.
- J The result is an estimated concentration that is less than the MRL but greater than or equal to the MDL.
- U The compound was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL.
- i The MRL/MDL has been elevated due to a matrix interference.
- X See case narrative.

Metals Data Qualifiers

- # The control limit criteria is not applicable. See case narrative.
- B The result is an estimated concentration that is less than the MRL but greater than or equal to the MDL.
- E The percent difference for the serial dilution was greater than 10%, indicating a possible matrix interference in the sample.
- M The duplicate injection precision was not met.
- N The Matrix Spike sample recovery is not within control limits. See case narrative.
- S The reported value was determined by the Method of Standard Additions (MSA).
- U The compound was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL.
- W The post-digestion spike for furnace AA analysis is out of control limits, while sample absorbance is less than 50% of spike absorbance.
- i The MRL/MDL has been elevated due to a matrix interference.
- X See case narrative.
- * The duplicate analysis not within control limits. See case narrative.
- + The correlation coefficient for the MSA is less than 0.995.

Organic Data Qualifiers

- * The result is an outlier. See case narrative.
- # The control limit criteria is not applicable. See case narrative.
- A A tentatively identified compound, a suspected aldol-condensation product.
- B The analyte was found in the associated method blank at a level that is significant relative to the sample result.
- C The analyte was qualitatively confirmed using GC/MS techniques, pattern recognition, or by comparing to historical data.
- D The reported result is from a dilution.
- E The result is an estimate amount because the value exceeded the instrument calibration range.
- J The result is an estimated concentration that is less than the MRL but greater than or equal to the MDL.
- N The result is presumptive. The analyte was tentatively identified, but a confirmation analysis was not performed.
- P The GC or HPLC confirmation criteria was exceeded. The relative percent difference is greater than 40% between the two analytical results (25% for CLP Pesticides).
- U The compound was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL.
- i The MRL/MDL has been elevated due to a chromatographic interference.
- X See case narrative.

Additional Petroleum Hydrocarbon Specific Qualifiers

- F The chromatographic fingerprint of the sample matches the elution pattern of the calibration standard.
- L The chromatographic fingerprint of the sample resembles a petroleum product, but the elution pattern indicates the presence of a greater amount of lighter molecular weight constituents than the calibration standard.
- H The chromatographic fingerprint of the sample resembles a petroleum product, but the elution pattern indicates the presence of a greater amount of heavier molecular weight constituents than the calibration standard.
- O The chromatographic fingerprint of the sample resembles an oil, but does not match the calibration standard.
- Y The chromatographic fingerprint of the sample resembles a petroleum product eluting in approximately the correct carbon range, but the elution pattern does not match the calibration standard.
- Z The chromatographic fingerprint does not resemble a petroleum product.

Case Narrative

COLUMBIA ANALYTICAL SERVICES, INC.

Client: Treadwell and Rollo, Inc.
Project: Presidio
Sample Matrix: Water

Service Request No.: D0601136
Date Received: 08/17/06

CASE NARRATIVE

All analyses were performed consistent with the quality assurance program of Columbia Analytical Services, Inc. (CAS). This report contains analytical results for samples designated for Tier III validation deliverables including summary forms and all of the associated raw data for each of the analyses. When appropriate to the method, method blank results have been reported with each analytical test.

Sample Receipt

One water sample was received for analysis at Columbia Analytical Services on 08/17/06, and subcontracted to the Kelso lab on 8/22/06. The sample was received in good condition and consistent with the accompanying chain of custody form. The sample was stored in a refrigerator at 4°C upon receipt at the laboratory.

General Chemistry Parameters

No anomalies associated with the analysis of these samples were observed.

Project/Client TREADWELL, ROLLO Service Request ~~K06~~ D0601136

Cooler received on 8/17/10 and opened on 8/17/10 by AB

1. Were custody seals on outside of coolers? Y ☒ N
If yes, how many and where? _____
2. Were custody seals intact? ~~Y~~ N
3. Were signature and date present on the custody seals? ~~Y~~ N
4. Is the shipper's airbill available and filed? If no, record airbill number: _____ ☒ Y N
5. COC# _____
Temperature of cooler(s) upon receipt: (°C) 3.5 _____
Temperature Blank: (°C) _____
- Were samples hand delivered on the same day as collection? Y ☒ N
6. Were custody papers properly filled out (ink, signed, etc.)? ☒ Y N
7. Type of packing material present ICE, BUBBLE WRAP
8. Did all bottles arrive in good condition (unbroken)? ☒ Y N
9. Were all bottle labels complete (i.e analysis, preservation, etc.)? ☒ Y N
10. Did all bottle labels and tags agree with custody papers? ☒ Y N
11. Were the correct types of bottles used for the tests indicated? ☒ Y N
12. Were all of the preserved bottles received at the lab with the appropriate pH? ~~Y~~ N
13. Were VOA vials checked for absence of air bubbles, and if present, noted below? ~~Y~~ N
14. Were the 1631 Mercury bottles checked for absence of air bubbles, and if present, noted below? ~~Y~~ N
15. Did the bottles originate from CAS/K or a branch laboratory? ☒ Y N
16. Are CWA Microbiology samples received with >1/2 the 24hr. hold time remaining from collection? ~~Y~~ N
17. Was C12/Res negative? Y ☒ N

Explain any discrepancies: _____

**DATA QUALITY REPORT
INORGANICS**

Explain any "no" responses to questions below, and any corrective actions in the comments section below.

1. Is the method name and number correct and appropriate? ☒ yes/no/NA
2. Holding times met for all analyses and for all samples? ☒ yes/no/NA
3. Are calculations correct? ☒ yes/no/NA
4. Is the reporting basis correct? (Dry Weight) ☒ yes/no/NA
5. All quality control criteria met? ☒ yes/no/NA
 - a. Is the calibration curve correlation coefficient ≥ 0.995 ? ☒ yes/no/NA
 - b. MBs, CCVs, CCBs, LCSs, Dups, and Spikes, analyzed at proper frequency? ☒ yes/no/NA
 - c. Are ICVs, CCVs, and CCBs all within acceptance limits? ☒ yes/no/NA
 - d. Are results for methods blanks all ND? ☒ yes/no/NA
 - e. Are all QC samples within acceptance criteria? (LCS % rec, MS/DMS % rec, DUP or MS/DMS RPDs, etc.) ☒ yes/no/NA
 - f. Are all exceptions explained? ☒ yes/no/NA
6. Are all service requests that apply attached? ☒ yes/no/NA
7. Are all samples labelled correctly? ☒ yes/no/NA
8. Have all instructions on the service request been followed? (e.g. Special MRLs, QC on a specific sample) ☒ yes/no/NA
9. Are detection limits and units reported correctly? ☒ yes/no/NA
10. Are proper Analysis/Extraction stickers included on report? ☒ yes/no/NA
11. Is the unused space on the benchsheet crossed out? ☒ yes/no/NA
12. Was analysis turned in by the due date? (n-2) (If not record SR#) ☒ yes/no/NA

RE: CAS Service Request - D0601136
Amended Data for Treadwell and Rollo
Presidio

Dear Josh Graber:

Enclosed is the amended data for the General Chemistry portion of the above-mentioned service request. The modified Initial Calibration Summary Form 6A now lists %RSD for individual quantitation peaks and the average %RSD for specific Aroclor. Please replace the affected forms with those attached.

Columbia Analytical Services appreciates your business and looks forward to serving your future analytical needs. If you have any questions concerning the data or if you need additional information, please call me at (530) 244-5227.

Sincerely,
Columbia Analytical Services

Karen Sellers
Project Manager

RE: Presidio/2893

TREADWELL & ROLLO

Dear Josh:

Enclosed are the results of the sample(s) submitted to our laboratory on December 6, 2006. For your reference, these analyses have been assigned our service request number D0601981.

All analyses were performed according to our laboratory's quality assurance program. The test results meet requirements of the NELAP standards except as noted in the case narrative report. All results are intended to be considered in their entirety, and Columbia Analytical Services, Inc. (CAS) is not responsible for use of less than the complete report. Results apply only to the items submitted to the laboratory for analysis and individual items (samples) analyzed, as listed in the report.

Please call if you have any questions. My extension is 104. You may also contact me via email at KSellers@redding.caslab.com.

Respectfully submitted,

Columbia Analytical Services, Inc.

Karen Sellers
Project Chemist

CC: Donna Breaux

Approved Laboratory for Wastewater and Hazardous Waste
Lab ID 999767340

CAS/Redding: Data Qualifiers

Organic Analyses

- A -- This qualifier indicates that a Tentatively Identified Compound (TIC) is a suspected aldol-condensation product.
- B -- This qualifier is used when the analyte is found in the associated blank as well as the sample, indicating possible blank contamination. The data user should carefully evaluate the qualified analyte and the reported concentrations.
- C -- This qualifier indicates the presence of this compound has been confirmed by the GC/MS analysis.
- D -- This qualifier is used for all the analytes identified in an analysis at a secondary dilution factor. "D" qualifiers are used only for the samples reported at more than one dilution factor.
- E -- This qualifier indicates that the value reported exceeds the linear calibration range for that analyte. Therefore, the sample should be reanalyzed at the appropriate dilution. The "E" qualified amount is an estimated concentration, and the results of the dilution will be reported on a separate Form I.
- J -- Indicates an estimated value. This qualifier is used when the data indicates the presence of a target analyte below the reporting limit or the presence of a Tentatively Identified Compound (TIC).
- N -- This qualifier indicates presumptive evidence of an analyte. This flag is only used for Tentatively Identified Compounds (TIC) where the identification is based on a mass spectral library research. It is applied to all TIC results. For generic characterization of a TIC, such as a chlorinated hydrocarbon, the "N" qualifier is not used.
- P -- This qualifier is used for target analytes when there is a greater than 40% difference for detected concentrations between the two columns or detectors. The concentration value is reported on Form I and flagged with a "P".
- U -- Indicates the compound was analyzed for but not detected. The number adjacent to the "U" qualifier indicates the reporting limit for that compound. The reporting limit can vary from sample to sample depending on dilution factors or percent moisture adjustments when indicated.
- DL -- Diluted reanalysis. "DL" indicates that the results were determined in an analysis of a secondary dilution of a sample or extract. A digit to indicate multiple dilutions of the sample or extract may follow the "DL" suffix. The results of more than one diluted reanalysis may be reported.
- MS -- Matrix spike (may be followed by a digit to indicate multiple matrix spikes within a sample set).
- MSD -- Matrix spike duplicate (may be followed by a digit to indicate multiple matrix spikes within a sample set).
- R -- Reanalysis. The extract was reanalyzed without re-extraction. The "R" is not used if the sample was also re-extracted. It may be followed by a digit to indicate multiple reanalysis of the sample at the same dilution.
- RE -- Re-extraction and reanalysis. The sample was re-extracted and reanalyzed. It may be followed by a digit to indicate multiple re-extracted analysis of the same sample at the same dilution.

Metals and Wet Chemistry Analyses

- B/J -- The reported value obtained was less than the MRL/CRDL, but greater than or equal to the MDL/IDL.
- U -- The value was less than the MDL/IDL or was not detected.
- E -- The reported value is estimate because of interference.
- N -- Spiked sample recovery not within control limits.
- ND -- Not detected at or above the MRL/CRDL.
- * -- Duplicate analysis not within control limits.

COLUMBIA ANALYTICAL SERVICES, INC.

Client: Treadwell and Rollo, Inc.
Project: Presidio
Sample Matrix: Aqueous

Service Request No.: D0601981
Date Received: 12/06/06

CASE NARRATIVE

All analyses were performed consistent with the quality assurance program of Columbia Analytical Services, Inc. (CAS). This report contains analytical results for samples designated for Tier III data deliverables.

Sample Receipt

Five aqueous samples were received for analysis at Columbia Analytical Services on 12/06/06.

No discrepancies were noted upon initial sample inspection. The samples were received in good condition and consistent with the accompanying chain of custody form. The samples were stored in a refrigerator at 4°C upon receipt at the laboratory.

Volatile Organic Compounds by EPA Method 8260B

No anomalies associated with the analysis of these samples by the above-mentioned method were observed.

General Chemistry Parameters (310.1, 300.0, 160.1)

The following samples required dilution due to elevated levels of target analytes:

- LF6GW103CL, 231GW09CL and 1065PZ1BCL for Sulfate
- 231GW09CL for Nitrate
- 1065MW9ACL and 1065PZ1BCL for Chloride

The following sample required dilution due to elevated levels of matrix interference:

- LF6GW103CL for Nitrate

The reporting limits are adjusted to reflect the dilutions.

Dissolved Metals (6010B, 6020, 7470)

The post spike recoveries of Calcium, Magnesium, Sodium and Potassium for sample 1065PZ1BCL and Mercury for sample LF6GW103CL were outside control criteria. Recovery in the Laboratory Control Sample (LCS) was acceptable, which indicates the analytical batch was in control. The post spike outlier suggests a potential high bias in this matrix. No further corrective action was taken.

The reporting limit standard for Selenium was outside of acceptance, samples affected were non-detected. This outlier suggests a potential high bias in this run. No further corrective action was taken.

Diesel Range Organics by EPA Method 8015B

No anomalies associated with the analysis of these samples were observed.

Approved by: _____

Date: _____

1-22-07

COLUMBIA ANALYTICAL SERVICES, INC.

Gasoline Range Organics by EPA Method 8015B

No anomalies associated with the analysis of these samples by the above-mentioned method were observed.

BTEX by EPA Method 8021

The primary evaluation criterion was exceeded for the following analytes in Continuing Calibration Verification (CCV) NP121201: Methyl-tert-Butyl Ether. In accordance with CAS standard operating procedures, the alternative evaluation specified in the EPA method was performed using the average percent recovery of all analytes in the verification standard. The standard meets the alternative evaluation criteria.

Organochlorine Pesticides by EPA Method 8081A

The upper control criterion was exceeded for the following surrogate in Initial Calibration Verification (ICV) D061208022: Decachlorobiphenyl. Since the apparent problem equates to a potential high bias, the data quality is not affected. No further corrective action was taken.

The primary evaluation criterion was exceeded for 4,4'-DDE in Continuing Calibration Verification (CCV) of D061213031. In accordance with CAS standard operating procedures, the alternative evaluation specified in the EPA method was performed using the average percent recovery of all analytes in the verification standard. The standard meets the alternative evaluation criteria. The field samples analyzed in this sequence did not contain the analyte in question. Since the apparent problem equates to a potential high bias, the data quality is not affected. No further corrective action was taken.

PCB Aroclors by EPA Method 8082

The surrogate recovery of Decachlorobiphenyl in sample LF6GW103CL was below the Project specific acceptance criterion. Per the project QAPP, this sample was reanalyzed for confirmation. The reanalysis produced similar result. The results of the original analysis are reported. No further corrective action was taken.

Polynuclear Aromatic Hydrocarbons by EPA Method 8310

No anomalies associated with the analysis of these samples by the above-mentioned method were observed.

Sulfide by Method 376.2

See Appendix

QC Summary

COLUMBIA ANALYTICAL SERVICES, INC.

QA/QC Report

Client: Treadwell and Rollo, Inc.
Project: Presidio/2893
Sample Matrix: Water

Service Request: D0601981

Surrogate Recovery Summary
Diesel / Motor Oil Range Organics

Extraction Method: EPA 3510C
Analysis Method: 8015B

Units: PERCENT
Level: Low

<u>Sample Name</u>	<u>Lab Code</u>	<u>Sur1</u>	<u>Sur2</u>
231GW09CL	D0601981-002	99	97
1065MW9ACL	D0601981-003	107	105
1065PZ1BCL	D0601981-004	121	119
Method Blank	DWG0601058-3	104	102
Lab Control Sample	DWG0601058-1	127	124
Duplicate Lab Control Sample	DWG0601058-2	130	128

Surrogate Recovery Control Limits (%)

Sur1 = Octacosane	65-135
Sur2 = n-Triacontane	65-135

Results flagged with an asterisk (*) indicate values outside control criteria.

Results flagged with a pound (#) indicate the control criteria is not applicable.

Service Request No: D0601981

Karen Sellers
Columbia Analytical Services
5090 Caterpillar Rd.
Redding, CA 96003

RE: Presidio/2893

Dear Karen:

Enclosed are the results of the sample(s) submitted to our laboratory on December 06, 2006. For your reference, these analyses have been assigned our service request number D0601981.

All analyses were performed according to our laboratory's quality assurance program. The test results meet requirements of the NELAC standards. Exceptions are noted in the case narrative report where applicable. All results are intended to be considered in their entirety, and Columbia Analytical Services, Inc. (CAS) is not responsible for use of less than the complete report. Results apply only to the items submitted to the laboratory for analysis and individual items (samples) analyzed, as listed in the report.

Please call if you have any questions. My extension is 3376. You may also contact me via Email at GSalata@kelso.caslab.com.

Respectfully submitted,

Columbia Analytical Services, Inc.

Gregory Salata, Ph.D.
Project Chemist

DOH	Department of Health
EPA	U. S. Environmental Protection Agency
ELAP	Environmental Laboratory Accreditation Program
GC	Gas Chromatography
GC/MS	Gas Chromatography/Mass Spectrometry
LUFT	Leaking Underground Fuel Tank
M	Modified
MCL	Maximum Contaminant Level is the highest permissible concentration of a substance allowed in drinking water as established by the USEPA.
MDL	Method Detection Limit
MPN	Most Probable Number
MRL	Method Reporting Limit
NA	Not Applicable
NC	Not Calculated
NCASI	National Council of the Paper Industry for Air and Stream Improvement
ND	Not Detected
NIOSH	National Institute for Occupational Safety and Health
PQL	Practical Quantitation Limit
RCRA	Resource Conservation and Recovery Act
SIM	Selected Ion Monitoring
TPH	Total Petroleum Hydrocarbons
tr	Trace level is the concentration of an analyte that is less than the PQL but greater than or equal to the MDL.

Inorganic Data Qualifiers

- * The result is an outlier. See case narrative.
- # The control limit criteria is not applicable. See case narrative.
- B The analyte was found in the associated method blank at a level that is significant relative to the sample result.
- E The result is an estimate amount because the value exceeded the instrument calibration range.
- J The result is an estimated concentration that is less than the MRL but greater than or equal to the MDL.
- U The compound was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL.
- i The MRL/MDL has been elevated due to a matrix interference.
- X See case narrative.

Metals Data Qualifiers

- # The control limit criteria is not applicable. See case narrative.
- B The result is an estimated concentration that is less than the MRL but greater than or equal to the MDL.
- E The percent difference for the serial dilution was greater than 10%, indicating a possible matrix interference in the sample.
- M The duplicate injection precision was not met.
- N The Matrix Spike sample recovery is not within control limits. See case narrative.
- S The reported value was determined by the Method of Standard Additions (MSA).
- U The compound was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL.
- W The post-digestion spike for furnace AA analysis is out of control limits, while sample absorbance is less than 50% of spike absorbance.
- i The MRL/MDL has been elevated due to a matrix interference.
- X See case narrative.
- * The duplicate analysis not within control limits. See case narrative.
- + The correlation coefficient for the MSA is less than 0.995.

Organic Data Qualifiers

- * The result is an outlier. See case narrative.
- # The control limit criteria is not applicable. See case narrative.
- A A tentatively identified compound, a suspected aldol-condensation product.
- B The analyte was found in the associated method blank at a level that is significant relative to the sample result.
- C The analyte was qualitatively confirmed using GC/MS techniques, pattern recognition, or by comparing to historical data.
- D The reported result is from a dilution.
- E The result is an estimate amount because the value exceeded the instrument calibration range.
- J The result is an estimated concentration that is less than the MRL but greater than or equal to the MDL.
- N The result is presumptive. The analyte was tentatively identified, but a confirmation analysis was not performed.
- P The GC or HPLC confirmation criteria was exceeded. The relative percent difference is greater than 40% between the two analytical results (25% for CLP Pesticides).
- U The compound was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL.
- i The MRL/MDL has been elevated due to a chromatographic interference.
- X See case narrative.

Additional Petroleum Hydrocarbon Specific Qualifiers

- F The chromatographic fingerprint of the sample matches the elution pattern of the calibration standard.
- L The chromatographic fingerprint of the sample resembles a petroleum product, but the elution pattern indicates the presence of a greater amount of lighter molecular weight constituents than the calibration standard.
- H The chromatographic fingerprint of the sample resembles a petroleum product, but the elution pattern indicates the presence of a greater amount of heavier molecular weight constituents than the calibration standard.
- O The chromatographic fingerprint of the sample resembles an oil, but does not match the calibration standard.
- Y The chromatographic fingerprint of the sample resembles a petroleum product eluting in approximately the correct carbon range, but the elution pattern does not match the calibration standard.
- Z The chromatographic fingerprint does not resemble a petroleum product.

Clear Narrative

COLUMBIA ANALYTICAL SERVICES, INC.

Client: Treadwell and Rollo, Inc.
Project: Presidio/2893
Sample Matrix: Water

Service Request No.: D0601981
Date Received: 12/06/06

CASE NARRATIVE

All analyses were performed consistent with the quality assurance program of Columbia Analytical Services, Inc. (CAS). This report contains analytical results for samples designated for Tier III validation deliverables including summary forms and all of the associated raw data for each of the analyses. When appropriate to the method, method blank results have been reported with each analytical test.

Sample Receipt

Five water samples were received for analysis at Columbia Analytical Services on 12/06/06. The samples were received in good condition and consistent with the accompanying chain of custody form. The samples were stored in a refrigerator at 4°C upon receipt at the laboratory.

General Chemistry Parameters

No anomalies associated with the analysis of these samples were observed.

PC HLG

Project/Client CAS (Redding) Service Request K06 10601981
Cooler received on 12-8-06 and opened on 12-8-06 by BW

1. Were custody seals on outside of coolers? (Y) N
If yes, how many and where? _____
2. Were custody seals intact? (Y) N
3. Were signature and date present on the custody seals? (Y) N
4. Is the shipper's airbill available and filed? If no, record airbill number: UPS 1Z52X 72X 01-4568-4179 (Y) N
5. COC# _____
Temperature of cooler(s) upon receipt: (°C) 4-8 _____
Temperature Blank: (°C) N-P _____
- Were samples hand delivered on the same day as collection? (Y) N
6. Were custody papers properly filled out (ink, signed, etc.)? (Y) N
7. Type of packing material present ice, gel packs, hard ice
8. Did all bottles arrive in good condition (unbroken)? (Y) N
9. Were all bottle labels complete (i.e analysis, preservation, etc.)? (Y) N
10. Did all bottle labels and tags agree with custody papers? (Y) N
11. Were the correct types of bottles used for the tests indicated? (Y) N
12. Were all of the preserved bottles received at the lab with the appropriate pH? (Y) N
13. Were VOA vials checked for absence of air bubbles, and if present, noted below? (Y) N
14. Were the 1631 Mercury bottles checked for absence of air bubbles, and if present, noted below? (Y) N
15. Did the bottles originate from CAS/K or a branch laboratory? (Y) N
16. Are CWA Microbiology samples received with >1/2 the 24hr. hold time remaining from collection? (Y) N
17. Was C12/Res negative? (Y) N

RE: CAS Service Request - D0601981
Amended Data for Treadwell and Rollo
Presidio

Dear Josh Graber:

Enclosed is the amended data for the Wet Chemistry, Metals, and Pesticides portions of the above-mentioned service request. The amendment was created to add the missing calibration data. Please place the attached forms to the end of the original report.

Columbia Analytical Services appreciates your business and looks forward to serving your future analytical needs. If you have any questions concerning the data or if you need additional information, please call me at (530) 244-5227.

Sincerely,
Columbia Analytical Services

Douglas Burnett
Project Manager
